

# Grant Management System

---

By CloudWave

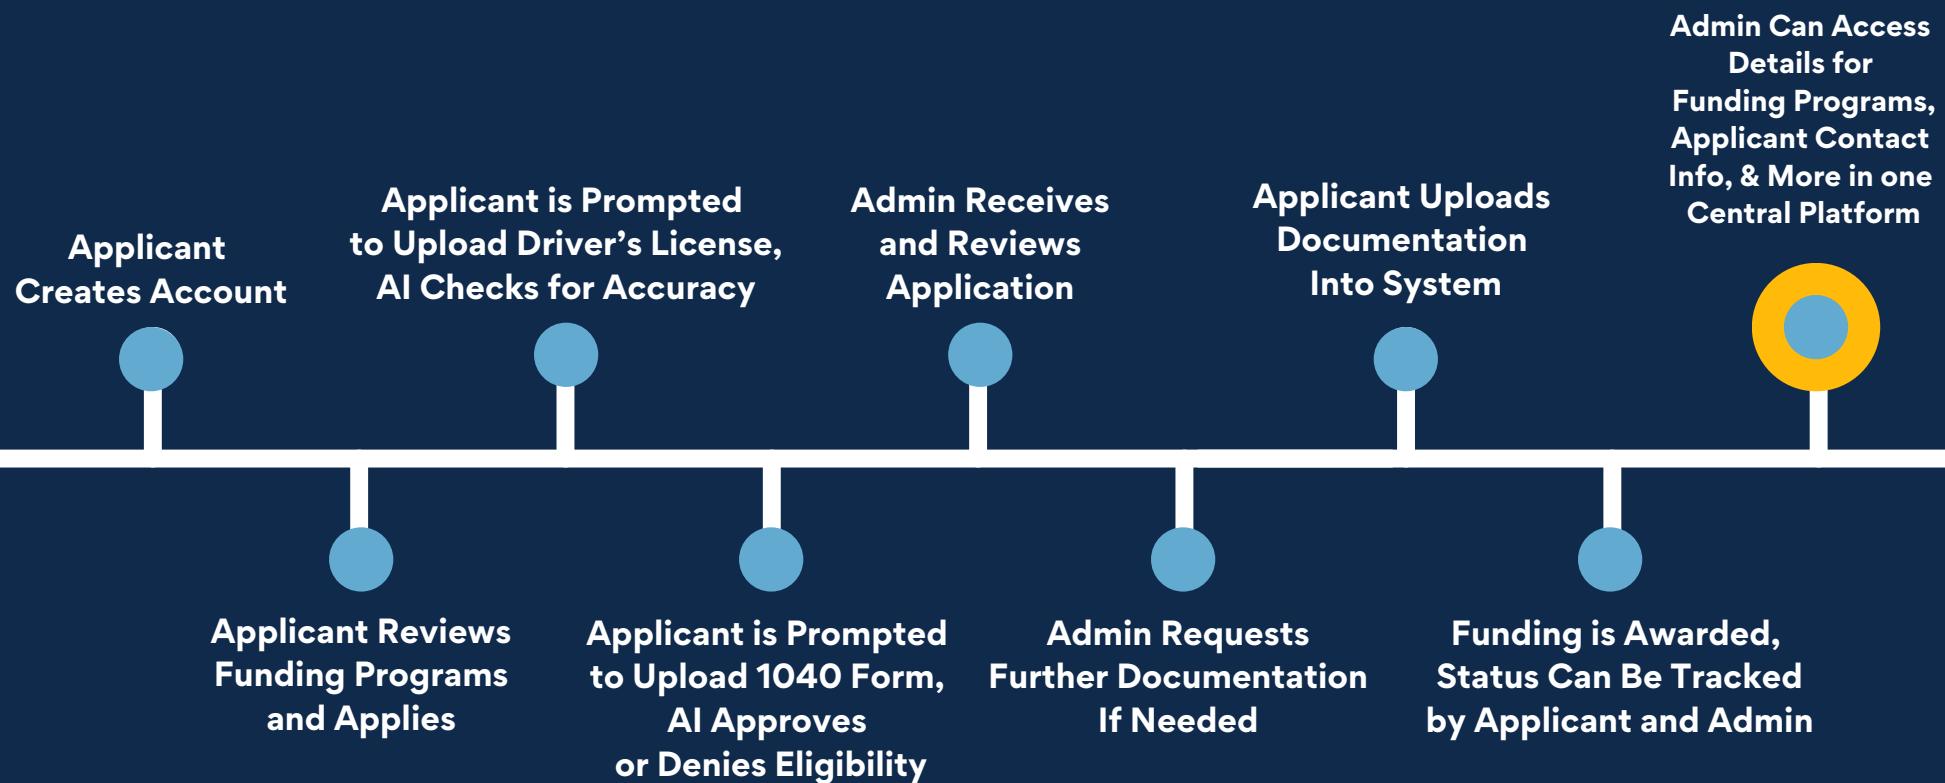

# How It Works

It's as easy as 1, 2, 3...

- 1 Applicants create an account, log in, and apply for funding with AI tools to verify their identity and income level.
- 2 Admins review applications, communicating with applicants and with each other.
- 3 After appropriate documentation is submitted, funding is approved or denied. The details and status of grant funding is continuously tracked in the system.

# How It Works

Each step takes place within the same system, making it easier than ever to track applications and organize data.

# AI Features

## Driver's License Verification

Confirms that the info registered on the application matches the identity on the uploaded driver's license.

## 1040 Tax Form Income Verification

Confirms that the applicant meets the income level criteria to be eligible for the funding program.

## Document Digitizer

Scans documents for applicant info (name, address, DL number, etc) and instantly digitizes it for admins.

## 5-Point Summary Builder

Scans the applicant's justification for receiving a grant for the most relevant info and summarizes it into 5 key bullet points for admins to review.

# Applicant View

The following slides show the step-by-step process applicants take to apply for grants and review their funding status in the system.

# New Applicant Registration

When a new user wants to apply for a grant, this is the front end view of the system they will use to register for an account. The applicant can review active funding programs, apply for grants, and check the status on previous funding requests all from one central location.

## My Funding Requests

In this tab, applicants can track the status of ongoing funding requests.

# Driver's License Verification

When a user decides to apply for a grant, the system will prompt them to upload their driver's license as the first step. From there, the AI technology will scan the license and determine whether or not the identity matches the user's account info.

Apply

# 1040 Tax Form Verification

If the user is eligible, then the application will move to the “My Funding Requests” tab where the user can track its progress as it is reviewed by admins. If the user is not eligible, they will receive this error message and will not be able to move forward with the application process. This vetting system saves administrators valuable time.

## Admin View

The following slides show the system features used by admins to review and approve funding requests, access documents, look up applicant info, and more.

# Funding Requests

New funding requests from applicants will appear here so that admins can review them and determine whether or not they meet the grant requirements. AI technology has already vetted each applicant's income using their 1040 tax form to confirm that they are eligible for their preferred grant. Admins will also find a 5-point summary of the applicant's grant justification details generated by AI to speed up the approval process.

Application Summary

. The Little Lamb Literacy Center is seeking funding for its Digital Literacy Lamb Academy project, which will help children and adolescents in the community improve their digital literacy skills. The project will provide interactive lesson plans and immersive learning experiences where students can interact with professionals who use digital literacy skills in their careers. The funding will support the development of the project and help prepare students for their future professional lives.

Application Highlights

1. Little Lamb Literacy Center is seeking \$25,000 in funding for their Digital Literacy Lamb Academy project.
2. The project will provide children and adolescents with ways to improve their digital literacy skills.
3. The eight specific components of digital literacy include critical thinking, creativity, safety, and collaboration.
4. Many of the children and adolescents served by Little Lamb Literacy Center lack one or more of these components.
5. The project will help prepare students for their future professional lives and provide them with valuable digital skills.

Application Justification  
My name is Sameen Root, and I am the founder of Little Lamb Literacy Center. In our six years in Robinston, we have worked to help children and adolescents realize their highest literacy potential. We do this by providing each student with meaningful learning experiences through immersive learning strategies and personalized instruction.

We are seeking funding for our upcoming project, Digital Literacy Lamb Academy, which provides children and adolescents with ways to improve their digital literacy skills. In our preliminary research, we discovered that there are eight specific components of digital literacy, including topics such as critical thinking, creativity, safety and collaboration. We also learned that many of the children and adolescents we serve lack one or more of these components.

Funding for this project is essential because with it we can help children and adolescents in our community master digital literacy and attain important skills for advancing their educational journeys. Comprehensively, we are seeking \$25,000 in funding. This financial support will allow us to develop interactive lesson plans and provide students with immersive learning experiences where

## 5-Point Summary

The Grant Management application uses AI technology to scan each applicant's justification for receiving grant funding and summarize it into 5 key points for admins to review.
